

NEW LASER  
LINES!

# Abberior EPYCON

## Excitation wavelengths

## Dyes

For confocal: all standard dyes

## Features:

- ✓ 4 fluorescence excitation lines: 405 nm (UV), 488 nm, 561 nm, 640 nm
- ✓ Upgradable to STEDYCON: cutting-edge STED at 30 nm resolution
- ✓ Upgradable to Fluorescence Lifetime Imaging (FLIM)
- ✓ Installation within minutes and highly affordable
- ✓ Software: browser-based control software operational on any modern PC, Mac or tablet
- ✓ EPYCON is tested with all microscope stands and many objective lenses from every major vendor

## Further Details:

- ✓ Fits every camera port
- ✓ No warm-up time, ready within a minute
- ✓ Easy-to-use (<15 minutes of training required)
- ✓ Maintenance-free and low follow-up costs
